_____

Objective:

Passionate self-motivated programmer seeks the opportunity to develop innovative games and work with others to expand his skill set.

Skills:

Primary: Unity3D, C#, Adobe Air, Actionscript 3
Secondary: C++, ASP .NET, SQL, HTML, CSS, JavaScript

Professional Experience:

Kabam
Lead Software Engineer
June 2012 - October 2013
- Developed a space themed MMO called Imperium: Galactic War.
- Lead a team of four as we brought Imperium to multiple platforms.
- Engineered a front end architecture that allowed us to easily take the web version onto mobile devices using Adobe Air.
- Rebuilt a redesigned Imperium using a similar architecture in Unity (C#)

Turpitude Inc.
Software Engineer
February 2011 - February 2012
- Engineered the client side architecture of Style Street.
- Developed features for the preexisting game: Wedding Street.
- Managed time, effort and communication while telecommuting full time.

Playdom
Software Engineer
January 2008 - January 2011
- Developed Kogamu, a MMORPG designed for Facebook.
- Developed RockFREE, an MMO, similar to Guitar hero, designed for Facebook.
- Team Lead for Prize Potato, an asynchronous multi-player Facebook game designed by David Perry.
- Gained valuable experience working on and managing teams using agile methodologies.

Jenkat Media, Inc.
Lead Flash Engineer
January 2007 - December 2007
- Developed the online game Fresh Air Solitaire and retail game Café Mahjongg
- Rescued and completed development of three online games when 3rd party developers could no longer continue production

Demand Media, Inc.
Flash Developer
April 2003 - January 2007
- Team lead for the popular retail games: Belle's Beauty Boutique and Master Qwan's Mahjong.
- Developed the multi-player games: Pool, Backgammon, Hearts and Spades.
- Developed 12 social games spanning multiple genres.

Education:

BS Computer Science, 2004 - University Houston Victoria
AAS Web Design, 2001 - University Houston Victoria
